SKILLS

Languages : TypeScript, JavaScript, Go, HTML/CSS

Frameworks : React.js, Next.js, Node.js, Nest.js, Express.js, Redux Toolkit

Databases & Cloud : AWS, PostgreSQL, MongoDB, Docker, Cloudflare, Typesense

Libraries & Tools : GraphQL, REST APIs, Tailwind CSS, Material UI, Shadcn UI, Stripe, Git

EXPERIENCE

Sath Inc.

Oct. 2024 – Present

Senior Software Engineer

Schaumburg, USA (Remote)

- **Reduced search latency by 40%**, as measured by query response times, **by architecting and leading the migration** of a legacy Java/Elasticsearch system to a modern Node.js/Typesense stack, eliminating legacy dependencies flagged by internal stakeholders.
- **Cut payment failures by 15%**, as measured by revenue recognition accuracy, **by modernizing the enterprise billing engine** with advanced Stripe logic (proration, automated corrections) to resolve discrepancies surfaced by the finance team.
- **Reduced manual operations overhead by 60%**, as measured by role-assignment processing time, **by designing a modular workflow engine** for dynamic user entitlement management.
- **Cut API load by 30% and improved Core Web Vitals**, as measured by frontend performance metrics, **by spearheading the migration** from Angular to React.js and implementing TanStack Query for aggressive caching.

OpenXcell Technolabs

June 2022 – Oct. 2024

Software Engineer

Ahmedabad, India

- **Improved user session speeds by 40%**, as measured by database load and response latency, **by engineering high-performance GraphQL APIs** for a B2B consulting platform and integrating Redis caching strategies.
- **Increased organic traffic and SEO performance**, as measured by search ranking metrics, **by leading the modernization** of legacy web applications to Next.js with Server-Side Rendering (SSR) and static generation.
- **Increased developer velocity by 50%**, as measured by feature delivery speed, **by designing a reusable component library** and establishing UI patterns for the AJIO B2B Wholesaler platform, scoped from friction points raised by the engineering team.

Gateway Group Of Companies

Oct. 2020 – May 2022

Software Engineer

Ahmedabad, India

- **Reduced third-party integration time by 20%**, as measured by client delivery cycle length, **by developing scalable RESTful APIs** that standardized integration protocols for client-facing teams.

PROJECTS

AJIO Wholesaler Application

- **Reduced customer support inquiries by 35%**, as measured by return-status ticket volume, **by engineering an end-to-end product return flow** with a real-time tracking timeline using **React** and **Material-UI (MUI)**.

ReachLink (Healthcare Platform)

- **Reduced administrative booking time by 40%** for therapist onboarding, as measured by scheduling workflow duration, **by designing a HIPAA-compliant onboarding ecosystem** integrated with **Cronofy** for automated scheduling.

EDUCATION

V.V.P. Engineering College

July 2017 – June 2021

Bachelor of Engineering in Computer Science | **CGPA: 9.61/10.0**

Rajkot, India
